

TIP SHEET

SCREEN UNLOCKER
UN-Lok
Removes Locked Emulsions

Works with All Emulsions • Non-Toxic and Non-Caustic

UN-Lok is a revolutionary new product that works on all types of emulsion, including capillary film, usually within 30 minutes or less. This eco-friendly gel formula is easy to use and stays wet for up to 24 hours, giving you flexibility to clean at your own convenience.

Directions

- 1 Liberally apply UN-Lok to locked emulsion and rest of screen.
- 2 Let product sit for 10-30 minutes* and then scrub well with Biggee™ pad
- 3 Wash with power washer or water hose with pressure nozzle.
- 4 Wash thoroughly and repeat if needed for trouble spots.

**Note: More time may be needed for heavily locked areas.*

Usage Tips

- UN-Lok can be left on screens overnight.
- Check for loosened emulsion with fingernail.
- If desired, a degreaser can be used as a final cleaning step.
