

MagnaPrint® Wet Reveal

Ready-to-use printing paste that, when printed, disappears under application of water to reveal print underneath.

MagnaPrint® Wet Reveal is a brand new, ready-to-use special effect printing paste. When printed, the ink is opaque and will turn transparent when wet allowing screen printers to incorporate hidden effects beneath a white top coat of ink. The printed area returns to its original opaque appearance when dry. MagnaPrint® Wet Reveal is recommended for printing over the AquaFlex V2 system.

Application

To achieve maximum opacity, MagnaPrint® Wet Reveal is best printed through 43T (110) mesh screens with medium 65° shore rectangular profile squeegees.

We recommend 2 top coat layers with a flash in between. Adding more layers may result in the surface cracking.

Some colours that are printed underneath could be slightly visible more than others.

After printing the garment/panel should be cured, ideally for 2 minutes at 160°C (320°F).

SPECIFICATION

FABRIC TYPES

Cotton / Poly Cotton blends

MESH

43 T (110)

SQUEEGEE

Medium 65° Shore
Rectangular

STENCIL

Water resistant emulsion

CURE TEMPERATURE

2 minutes at 160°C (320°F)

ADDITIVES

Retardant Gel, Crosslinker 100,
Softener TS Conc

STORAGE

In cool place properly closed:
>5°C (40°F) <25°C (77°F)

HEALTH & SAFETY

MSDS available upon
request

CLEAN UP

Wash off screen using water
and mild detergent
